INSTITUTE OF TECHNOLOGY UNIVERSITY OF MORATUWA

NATIONAL DIPLOMA IN TECHNOLOGY

SEMESTER III CONTINUOUS ASSESSMENT 02

CONDUCTED IN JUNE 2026

IS 2304 HUMAN COMPUTER INTERACTION

Deadline: 12th June 2026

100 Marks

Objective:

Create a personal portfolio website using React.js that demonstrates your understanding of Human-Computer Interaction (HCI) by applying appropriate techniques, design principles, and user-centered design rules. The portfolio will also serve to showcase your readiness for internship opportunities.

Assessment Components

1. React.js Portfolio Website (70%)

Develop a React-based personal portfolio that includes the following sections:

Required Sections:

- Home: Brief introduction, your name, photo, and a welcoming message.
- About Me: Educational background, technical skills, career aspirations.
- Projects (Minimum 3):

  Each project should include:

  - ✔ Title and description
  - ✔ Technologies used
  - ✔ GitHub repository link
  - ✔ Screenshots or links
- Contact: Basic contact information or a form (no backend required).
- Navigation: Smooth navigation using React Router or similar.

- **You are required to deploy your React portfolio website online** using a free hosting platform such as Netlify, Vercel, or GitHub Pages. (any of you prefer)

HCI Requirements:

Clearly demonstrate your application of HCI concepts such as:

- User-centered design: Who are your target users? How did you design for them?
- Interface design principles: Apply at least 3 design rules or heuristics
- Accessibility considerations: Use of semantic HTML, alt text, readable fonts, colour contrast, etc.
- Feedback and consistency: Button actions, hover effects, success messages, etc.

2. Written Report (30%)

Submit a well-structured report explaining the technical and HCI aspects of your portfolio. Include:

Report Structure:

I. Cover Page: Name, Index Number, Module: Human-Computer Interaction
II. Title: React Portfolio Development with HCI Techniques
III. Table of Contents

1. Introduction
    Objective of the portfolio
    Brief introduction to HCI and why it matters in web design
2. Technologies Used
    React, routing library, styling frameworks, deployment tools, etc.
3. HCI Techniques and Rules Applied
    User-centered design process you followed
    HCI rules or heuristics applied (minimum 3), with examples from your site
    Accessibility and responsiveness features added
4. Project Descriptions
    Add all the screenshots and features implemented
5. Evaluation & Reflection
    How you ensured a good user experience
    Challenges faced, how they were overcome
    Improvements you would like to make
6. Conclusion

7. Learning outcomes

    How this project supports your internship goals

8. Deployed website link

Ex: Please visit my live React portfolio at: https://your-portfolio-link.netlify.app

Live deployed site URL (must be public and accessible)

(Make sure the link is clickable in your PDF or clearly written in your Word document and double-check that the website is live and accessible before submitting.)

Note: All submissions will be checked for plagiarism and the use of AI-generated or AI-assisted content. Any portfolio or report found to be copied or inauthentic will be subject to penalties as per academic regulations.
